PROFESSIONAL SUMMARY

AI & Data Science undergraduate with a strong foundation in Python, SQL, data analytics, and machine learning fundamentals, backed by six hands-on internships in data analysis, Python development, and database management. Skilled at translating raw data into actionable insights and building functional, real-world applications. Seeking a Software Engineering, Data Analyst, or AI/ML internship or entry-level role to apply structured problem-solving and deliver measurable results.

EDUCATION

Bachelor of Technology (B.Tech), Artificial Intelligence & Data Science Expected Graduation: 2028
Er. Perumal Manimekalai College of Engineering | CGPA: 9.0 / 10

TECHNICAL SKILLS

Programming Languages: Python, SQL
Databases: Relational Database Design, DBMS, SQL Querying
Data Analytics & Visualization: Excel, Tableau, Exploratory Data Analysis (EDA), Data Visualization
AI/ML: Machine Learning Fundamentals, Model Building & Evaluation, Graph-Based Algorithms
Tools & Platforms: Git, GitHub, VS Code, Google Colab
Core Concepts: Data Structures, Artificial Intelligence, Problem Solving, Algorithm Design

PROJECTS

AI Route Application — *Personal Project*
Python, AI/Route Optimization Concepts, Data Structures

- Designed and developed an AI-powered route optimization application solving inefficient manual route planning, enabling users to identify optimal paths based on distance, time, and cost constraints.
- Implemented core routing algorithms using graph-based data structures and optimization techniques, reducing route planning time versus manual methods.
- Built dynamic input handling, route comparison, and result visualization features to improve usability and decision-making for end users.
- Applied foundational AI/ML concepts to enhance route prediction accuracy, demonstrating practical algorithmic problem-solving beyond coursework.
- Documented the project on GitHub with clear setup instructions, showcasing end-to-end development from problem definition to functional deployment.

INTERNSHIP EXPERIENCE

Data Analysis Intern | *Cognifyz Technologies* Remote

- Performed exploratory data analysis (EDA) on structured datasets using Python and Excel to identify key trends supporting data-driven decisions.
- Cleaned and preprocessed raw data, improving dataset accuracy and reducing inconsistencies.
- Delivered analytical summaries and visualizations that supported actionable business insights within project deadlines.

Python Development Intern | *SaiKet Systems* Remote

- Developed and debugged Python scripts to automate repetitive tasks, improving workflow efficiency for assigned modules.
- Applied core programming concepts — data structures, functions, and file handling — to build reliable, reusable code.
- Collaborated with peer developers to test and refine scripts, ensuring functional accuracy prior to submission.

Data Science Intern | *SkillCraft Technology* Remote

- Built and evaluated foundational machine learning models on real-world datasets, strengthening practical understanding of the ML pipeline.
- Conducted data cleaning, feature analysis, and model testing, contributing to improved model reliability.
- Presented findings through clear visualizations and reports, translating technical results into actionable insights.

Data Analytics Trainee | *Besant Technologies* Remote

- Completed structured, hands-on training in data analytics tools and techniques, including data cleaning, visualization, and statistical analysis.
- Applied SQL and Excel to solve real-world analytical case studies, reinforcing core data analysis competencies.

Data Science Intern | *Prime Vector* On-site

- Assisted in analyzing datasets to extract patterns and support project-level, data-driven insights.
- Utilized Python and statistical methods to process and interpret data, contributing to improved analytical accuracy.

Database Management Intern | *Adviyo* On-site

- Assisted in designing, organizing, and maintaining relational databases to ensure efficient data storage and retrieval.
- Wrote and optimized SQL queries to support accurate data extraction and reporting for team projects.

CERTIFICATIONS

[Suggestion: List formal certificates earned, e.g., Besant Technologies Data Analytics Certificate.]

RELEVANT COURSEWORK

Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Machine Learning Fundamentals, Data Analysis & Statistics

LANGUAGES & SOFT SKILLS

Languages: English, Tamil *[confirm proficiency]* | **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Collaboration, Time Management
